Experience

Platform Engineer Dec 2024 – Present
Appwrite *Remote*

- Build and run Appwrite Cloud: PHP/Swoole services on Kubernetes, plus the edge network.
- Rewrote the Appwrite CLI in Go, and maintain the SDKs for 11+ languages.
- Built Appwrite's hosted MCP server with OAuth 2.1, exposing 981 API endpoints through four tools.
- Took observability and synthetic monitoring in-house on Grafana and OpenTelemetry.
- 2,000+ merged PRs across Appwrite's open-source and internal repositories.
- Joined as an Engineering Intern in Dec 2024; full-time since June 2025.

Backend Developer Intern Jul 2024 – Sep 2024
Skillarena *Remote*

- Led backend development using Node.js and Express.js, implementing a microservices architecture.
- Engineered a real-time messaging system using WebSockets and FastAPI, handling concurrent connections efficiently.
- Implemented comprehensive API documentation and testing protocols.

Full Stack Developer Intern Oct 2023 – Dec 2023
Clearmind AI *Remote*

- Developed key features using Next.js and TypeScript.
- Architected the Stripe payment integration, enabling user payments on the platform.
- Built an automated testing suite that reduced QA time.

Education

Master of Science in Software Engineering Sep 2026 – Present
University of Limerick, Ireland

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence) 2022 – 2026
Bennett University, Greater Noida, India *CGPA: 9.71*

Personal Projects

Cal Buddy – AI Calendar Assistant Live Demo | GitHub
TypeScript, Next.js, CopilotKit, Llama 3.2

- Built a calendar application serving 100+ daily active users with real-time updates.
- Integrated Llama 3.2 for smart scheduling, reducing meeting planning time.

Suraksha AI – Intelligent Surveillance System GitHub
Python, Flask, Firebase, YOLOv11

- Developed an ML-powered security system achieving 95% accuracy in threat detection.
- Built a real-time video processing pipeline handling 30+ FPS with edge computing.

Asclepius – Healthcare Management System GitHub
Python, SQLite, CustomTkinter

- Desktop application with role-based access control and medicine inventory management.

Technical Skills

Languages: PHP, Go, TypeScript/JavaScript, Python, Rust, C++, Java
Backend: Swoole, Node.js, Express.js, FastAPI, Django, REST, GraphQL, WebSocket
Frontend: React.js, Next.js, Svelte, Vue.js, Tailwind
Databases: PostgreSQL, MariaDB, MongoDB, Redis, Firebase
Infrastructure: Kubernetes, Docker, Grafana, OpenTelemetry, GitHub Actions, AWS

Achievements & Certifications

Awards: Dean's List (9.86 SGPA), DevFest'24 winner (Global OS Hackathon)
Certifications: Google IT Support, Cisco Cybersecurity, Postman API Expert, FPT University Summer Immersion Participant
